WORKING EXPERIENCE

HiSEVEN Sdn Bhd

Executive Frontend Developer

April 2024 - Present

- Engineered a headless CMS architecture using Next.js with Tailwind CSS for the frontend, leveraging both GraphQL and RESTful APIs to integrate with the WordPress backend, resulting in faster content delivery and improved site performance.
- Extended Ant Design to build a custom UI component library, ensuring design consistency and speeding up development across multiple projects.
- Implemented a monorepo development structure using Nx, enabling efficient code sharing between projects and improving the development workflow for the team.
- Designed and developed the company website, translating UI designs into a fully responsive and user-friendly experience, supporting multiple languages and regional settings to ensure seamless accessibility across devices and regions.

Avexis Solution Sdn Bhd

Intern Trainee of Frontend Developer

July 2023 - October 2023

- Applied the Angular Framework to migrate and improve the existing cryptocurrency system.
- Utilized the divide-and-conquer approach on the existing system to create reusable components.
- Prototyped a preliminary mobile user interface design using Figma.
- Developed a mobile tracking application using the Ionic Framework.
